M- Society

Connecting Residents

Vision:

Expect more pay less.

Bridging gap between neighbors and society

Architecture:

Various societies will be registered in a particular form and user can search his/her society.

After family registration, a request will be generated which needs to be confirmed by the society owner.

Shop owners can register themselves under a particular society and can deliver his/her services.

Society owner can invite some other society for a particular event.

Residents can lodge their complaints through a form.

Residents can request a worker for some issues.

Residents can manage their parking slots in case of excessive vehicles.

Working staff can request his requirements to the society owners.

Residents can create events.

Residents can share their things among other residents through a group sharing portal.

Revenue:

Shop owner's needs to pay to the society owner for registering themselves under a particular society on a monthly basis.

Administrator will generate his/her revenue from the society owners on yearly basis.
